

# POTENTIAL Plug process gaps and enhance core system capabilities with tailor-made accelerators

Beyontec Accelerators make it possible for insurance companies to deploy and streamline new business processes with existing systems. It provides the flexibility to manage insurance lifecycle across multiple lines from a single platform. These simple plug-in solutions can be quickly integrated with any core insurance solution.

To maintain an edge over competition, insurers need to streamline their business processes for higher productivity and maximum profitability.

Beyontec's suite of accelerators offers insurance companies a quick and cost-effective way to add and automate business processes that are not currently fulfilled by the core system, and to comply with changing regulations and business needs. All that they need to do is choose the accelerators based on the need and integrate them seamlessly into the core insurance system to save time, streamline processes and increase efficiency.

## BEYONTEC SUITE OF SPECIALIST ACCELERATORS

### Accelerator Portals

These portals are self-service enablers that help insurers extend the business activities to the web. They provide access to the right information to the right user constituents, to help them perform their tasks more efficiently and in real-time.

### Financial Analytical Accelerator

A system that can help you pre-configure the representation of your financial data based on specific needs. Users can now configure custom reports once, suiting the requirements of different audiences, and re-use these reports on a periodic basis without having to configure them every time.

## WHAT YOU GET

- Accelerator tools that can be implemented in less than four weeks for faster ROI
- An efficient way to introduce and automate new processes without changing your existing systems
- An online model that is secure, scalable and configured to your needs
- Advanced add-on features that compliment your existing system to enhance its functionality

### **Risk Accumulation Accelerator**

A tool that can help you assess risk-exposure accurately before underwriting any risk. It helps you leverage online maps for tracking risks at building, street, area, city or country levels, or analyze the distribution of risks, by location.

### **EVG Accelerator**

A quick-to-deploy and easy-to-run bot, it helps you get EVG-compliant. The tool smartly integrates and retrieves all policy information from your system and automatically updates the EVG portal, making sure every mandatory field is accurately filled in, without any manual intervention or changes to your existing process or system.

Beyontec's suite of accelerators is a must-have for insurance companies, to perform their business efficiently. Developed by Beyontec Solutions, a global insurance solution provider, these accelerators are fully-integrated, pre-configured, real-time solutions that offer a set of functionalities to meet the specific needs of businesses in the insurance sector.

### **Claims Recovery Accelerator**

A system that makes recovery of claims between insurance companies transparent, faster, and more efficient. By providing easy and quick access to all recovery-related information, it ensures absolute compliance in claims recovery, minimizing administrative costs of managing intra-company claims.

### **AML Accelerator**

The most accurate way for validating personal and financial details of the insured before quoting. By screening the data entered, this tool helps you avoid errors and ensures absolute AML regulatory compliance. Suspicious transactions can easily be tracked in real-time.

The advantage of Beyontec's suite of accelerators is that, it is compatible with any existing core insurance solution that you may be using.

## **WHY ACCELERATORS?**

Beyontec accelerators are tailor-made solutions that fulfill specific IT and business needs not addressed by existing insurance systems. They can be easily integrated in to any existing system, to enhance the core functionality and efficiency. They optimize the use of new age technologies and help insurers significantly save on total IT spends while improving overall time-to-market, performance and giving them a distinct advantage over competition.
