

Beyontec Financial Accounting

Beyontec Financial Accounting gives your customers the flexibility to pay their premiums in their preferred modes such as cheque, online, cash, or card - when and where they want.

It allows your employees to focus on exceptions rather than generic policies.

Features such as automated invoice generation, collection, premium renewal, and cheque printing simplifies processing for generic policies.

With this module, you can:

- Offer payment options before or after policy issuance

- Enable Multiple pay plans for each product
- Automate reminder e-mails for payment and invoices
- Ensure direct processing of debit/credit card and Automated Clearing House (ACH) payments
- Debit bank account for installment payments automatically
- Automate cancellation of policy for non-payment Automate renewal of premium processing
- Match receipts by statements of accounts for brokers
- Provide single cheque processing to stakeholders for multiple claims payments
